USAMA IQBAL

Full Stack Software Engineer

Islamabad, Pakistan | +92 300 5182525 | iqbal.usama0074@gmail.com | linkedin.com/in/usamas74

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1+ year of experience delivering production web, Web3, and Android applications using Next.js, React.js, TypeScript, Node.js, Express.js, and PostgreSQL. Skilled in designing scalable REST APIs, relational database schemas with 35+ tables, secure authentication systems, and automated CI/CD pipelines while collaborating in teams of up to 10 developers.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Solidity, SQL, Python, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Zustand, React Query, React Hook Form, Zod, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, Server Actions, NextAuth.js, Lucia Auth, JWT, OAuth 2.0, Webhooks
Databases: PostgreSQL, MongoDB, Firebase Firestore, Drizzle ORM, Prisma ORM, Database Design
Web3 & Mobile: Smart Contracts, wagmi, viem, ethers.js, ERC-20, Uniswap V3, Android (Java), Firebase Cloud Messaging
DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD, AWS S3, PM2, Linux, OpenAPI

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Trino Technologies, Islamabad **Oct 2025 - Present**

Natter - Real-Time Android Chat Application *Jul 2026 - Sep 2026*

- Developed a native Android chat app in Java supporting Android 7 to 14, delivering instant one-to-one messaging through Firebase Firestore real-time listeners with zero polling.
- Implemented push notifications for offline users using Firebase Cloud Messaging and Retrofit, and added live online/offline presence tracking via Android lifecycle events.

CryptoAgent - Web3 AI Agent Launchpad *Feb 2026 - Aug 2026*

- Engineered a decentralized AI agent launchpad on Base as part of a 6-member team, allowing users to launch ERC-20 tokens priced on an exponential bonding curve with automatic Uniswap V3 liquidity.
- Integrated upgradeable (UUPS) Solidity smart contracts into a Next.js 14 frontend with wagmi and viem, enabling on-chain agent deployment, token trading, and a 1% fee split.
- Designed a 9-table PostgreSQL schema with Drizzle ORM and delivered 25+ REST API endpoints secured by NextAuth.js wallet login, Discord OAuth, and email OTP.
- Automated deployments with a GitHub Actions CI/CD pipeline to a Linux server with PM2 process management, and added a referral leaderboard ranked by a weighted scoring algorithm.

VotingMachine - Event & Election Platform *Nov 2025 - Mar 2026*

- Architected an event and election platform for a Malaysian cooperative with Next.js 14, TypeScript, and PostgreSQL, powering an admin dashboard and a React Native app through 59 API routes.
- Secured elections with anonymous ballots, one-vote-per-member tokens, and atomic database transactions that prevent double voting.
- Implemented Lucia session authentication with Argon2id hashing, SMS/email OTP, and role-based access control (RBAC) across 4 roles; modeled 35+ tables across 2 databases.
- Delivered QR-based physical voting booths with automatic voter assignment and a live results dashboard refreshing every 30 seconds.

Full Stack Developer Intern | Devline Solutions, Lahore **Jun 2025 - Aug 2025**

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js, and MongoDB, integrating RESTful APIs for frontend-backend communication.
- Built Venuo, a responsive event booking interface with React.js, TypeScript, Vite, and Tailwind CSS, developing 15+ reusable, type-safe UI components.
- Modeled relational data with PostgreSQL and Prisma ORM, and used Git and GitHub for version control and team collaboration.

PROJECTS

E-Commerce Web Application | Next.js, PostgreSQL, Prisma ORM, NextAuth.js, Zustand, React Query

- Created a full-stack e-commerce platform with product catalog, cart, and checkout flows using Next.js, Tailwind CSS, and reusable UI components.
- Protected user accounts with NextAuth.js authentication and bcrypt password hashing, and built RESTful APIs for products, users, and orders backed by Prisma ORM and PostgreSQL.
- Optimized data flow with Zustand for client state and React Query caching for server state.

EDUCATION

Bachelor of Science in Software Engineering | FAST-NU, Lahore **Aug 2021 - Jan 2026**

Final Year Project: Crime Prediction Website built with the MERN stack, machine learning, Chart.js, and Maps API.
