EDUCATION

National University of Computer and Emerging Sciences (FAST-NU) Lahore, Pakistan
Bachelor of Software Engineering Sep2021 – June 2025
Major in Software Engineering
Cumulative GPA: **3.11/4.0**; Dean's List Fall 2023

WORK EXPERIENCE

ILI.DIGITAL Lahore, Pakistan
Associate Software Engineer Aug 2025 – Present

- Designed and developed scalable backend services using **Python, FastAPI, .NET, and NestJS** to support enterprise digital transformation solutions
- Built and maintained high-performance **RESTful APIs**, writing clean, efficient, and testable code following industry best practices
- Collaborated with cross-functional teams to deliver scalable, maintainable solutions, participating actively in code reviews, debugging, and system optimization

xNerds Lahore, Pakistan
Full stack developer Sep 2024 – Nov 2024

- Built full-stack web apps with **Next.js** and cross-platform mobile apps using **React Native**
- Deployed an internal **Mailcow** server, improving email reliability and reducing external dependencies
- Developed smart contracts and decentralized features for a **Web3 app** supporting on-chain workflows
- Collaborated across teams to deliver scalable, high-performance solutions under tight deadlines

PROJECTS

Knorr-Bremse **2026**

- Developed high-performance **RAG and LLM** solutions on **Azure** to automate complex data retrieval for a global braking systems leader, ensuring enterprise-grade scalability
- Built **FastAPI** inference APIs integrated with **Azure OpenAI** services; implemented vector search pipelines using Python for low-latency document retrieval

Heylog **2025**

- Built scalable **NestJS microservices** for a German logistics platform, integrating WhatsApp, Twilio, and Brevo to automate real-time supply chain communication
- Designed and maintained **PostgreSQL** schemas and event-driven communication patterns across distributed services for high-throughput logistics workflows

SkinSage **May 2025**

- Developed SkinSage, an **Expo (React Native)** app for real-time skin lesion capture and analysis
- Trained **TensorFlow** models to classify 18 skin conditions, optimized for mobile deployment
- Built and deployed **FastAPI** inference **APIs** and models on **Hugging Face Spaces** for low-latency predictions
- Integrated secure **RESTful** communication, achieving **sub-200ms** response times

ACTIVITIES

SOFTEC
Head of App Development competition Sep 2024 – May 2025

- Overseeing 50 teams (100 total participants) from concept to delivery
- Managed a leadership cohort—including one Co-Head and five Deputy Head—to coordinate judging, and schedules
- Streamlined event operations and communications, ensuring smooth execution and on-time completion across all stages of the competition
